MHA

An Association of Montana Health Care Providers

MHA is the principal advocate for the interests of members in their efforts to improve the health status of the communities they serve.

MHA is an association whose members provide the full spectrum of health care services, including hospital inpatient and outpatient, skilled nursing facility, home health, hospice, physician, assisted living, senior housing and insurance services.

Every not-for-profit acute care hospital in the state is a member, ranging from the smallest critical access hospitals providing primary care services in Montana's rural communities to the largest tertiary care hospitals in the state.

MHA offers a variety of services, including advocacy of members' interests with state and federal governmental agencies and legislative bodies, regulatory assistance, data products, education programs and communications.
